-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Frederick.

Frederick teaches an axle tube 6, a collar 7, a spindle 8, and a cross connector 14 extending through apertures in each of the axle tube, the collar, and the spindle to attach the spindle to the axle. Although a means for attaching the axle to the vehicle is not shown, it is inherent that the axle would have to have a means for attaching to the vehicle in order for the axle to be used.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ebert.

The axle assembly of Ebert comprises an axle tube 20, a collar 90, a spindle 70, and a means 102 for cross connecting the axle tube, the collar, and the spindle. The means 102 is a weld which extends through apertures in each of the connected members. See figures 8-11.

Although a means for attaching the axle to the vehicle is not shown, it is inherent that such a means must be present in order to mount the axle to a vehicle.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frederick in view Mogford et al.

Frederick does not show a pair of spring seats.

Mogford et al teaches the use of a pair of spring seats 8, 9 attached to an axle tube for mounting the axle to vehicle.

From this teaching it would have been obvious to provide a pair of spaced spring seats on the axle tube of Frederick in order to mount the axle to a vehicle and put the axle into use.

With respect to claims 5 and 6, Frederick further shows a means 8, 9 for attaching a wheel to the spindle, and as shown in figure 3, the components are tightly fitted together.

Allowable Subject Matter

6. Claims 7-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show other axle assemblies.
